SKILLS

Sales & Business Dev	ERP & Business	Technical	Professional
• Lead Generation • Customer Relationship Management • Client Communication • Cold Calling • Sales Prospecting • Business Development • Requirements Gathering • Stakeholder Management • Presentation Skills • Negotiation • Customer Engagement	• Enterprise Software • Business Process Understanding • ERP Fundamentals • Odoo ERP (Basic Understanding) • Requirements Analysis • Solution Demonstrations • Process Improvement	• .NET Core • Angular • SQL • Python • Azure DevOps • Git • Microsoft Office	• Team Collaboration • Time Management • Adaptability • Fast Learner • Communication • Analytical Thinking

WORK EXPERIENCE

Tech Unicorn – Dubai, UAE

Project Management Intern

- Collaborated with internal stakeholders to understand business requirements and coordinate project deliverables.
- Assisted in gathering and documenting client requirements for enterprise software solutions.
- Communicated regularly with development, QA, and business teams to ensure project objectives were achieved.
- Maintained project documentation, meeting records, and customer-related updates using Azure DevOps and Microsoft Teams.
- Participated in Agile ceremonies while coordinating activities across cross-functional teams.
- Developed strong communication and problem-solving skills by interacting with technical and business stakeholders.
- Supported software demonstrations and solution discussions within project teams.
- Learned how enterprise software solutions align with customer business needs.

Scienter Technologies (Pvt) Ltd

Jun 2024 – Apr 2025

Associate Software Engineer

- Developed and maintained enterprise software applications used by business clients.
- Worked closely with business analysts, QA engineers, and stakeholders to understand customer requirements.
- Investigated client-reported issues and collaborated with cross-functional teams to deliver effective solutions.
- Gained experience understanding business workflows and translating functional requirements into software solutions.
- Participated in Agile development and communicated progress with technical and business teams.

Software Engineering Intern

Jun 2023 – Jun 2024

- Assisted in testing and validating web application functionality.
- Supported senior developers in improving application quality.
- Participated in documenting software features and workflows.
- Worked with development teams to identify and resolve issues.

EDUCATION

Middlesex University Dubai
MSc Data Science & Artificial Intelligence (Part-Time)

Jan 2026

University of Central Lancashire
Bachelor of Software Engineering

March 2022 – May 2025

- First Class Honors (77.4% APM)
- Gold Medalist

PROJECTS

LashLens – AI Makeup Recommendation System

Technologies: Python, OpenCV, CNN, Angular

- Developed an **AI-based image analysis system** to measure eyelash features and recommend suitable makeup products.
- Implemented **computer vision pipelines** for feature extraction and preprocessing.
- Integrated machine learning models with a web application for real-time recommendations.
- Presented project findings and communicated technical concepts effectively to academic evaluators and conference participants.

Distributed Quiz Application

Technologies: Node.js, RabbitMQ, Docker, Terraform, Microsoft Azure

- Designed and implemented a **distributed microservices-based system** for scalable quiz delivery.
- Built backend services using **Node.js** and asynchronous messaging with **RabbitMQ**.
- Containerized applications using **Docker** and deployed to **Microsoft Azure**.
- Implemented infrastructure provisioning using **Terraform**.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the **12th International Conference on Computer Science and Information Technology (CSIT 2025)**.
