ABOUT ME

Frontend Developer with 2+ years of experience building responsive, high-performance web applications using modern technologies including Angular, React, HTML5, CSS3, and JavaScript. Strong focus on creating intuitive, visually polished user interfaces with clean, maintainable code. Passionate about emerging frontend technologies, with a growing interest in Rust and WebAssembly (Wasm) for next-generation web development. Experienced in Agile environments and committed to continuous learning and performance optimization.

SKILLS

Frontend Technologies:

HTML5, CSS3, JavaScript, Angular, React, Responsive Design, SVG

Styling & UI:

CSS Frameworks (Bootstrap), Flexbox, Grid, UI/UX Best Practices

Backend (Supporting):

Node.js, .NET Core, RESTful APIs

Emerging Technologies:

WebAssembly (Wasm), Rust (Learning), Interest in Leptos Framework

Tools & DevOps:

Git, TFS, Docker, Microsoft Azure, CI/CD Basics

Concepts:

Responsive Design, Performance Optimization, Clean Code, Agile/Scrum

EDUCATION

Middlesex University Dubai

MSc Datascience and Artificial Intelligence - (Part Time)

(Expected Jan 2026)

University Of Central Lancashire

BSc (Hons) Software Engineering - First Class Honour

- Gold Medalist
- APM - 77.4%

WORK EXPERIENCE

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

2024-2025

- Developed and maintained responsive front-end applications using Angular, ensuring cross-browser compatibility and performance
- Translated business requirements into clean, scalable, and maintainable UI components
- Improved frontend performance by optimizing API consumption and UI rendering logic
- Collaborated with designers and backend teams to deliver intuitive user experiences
- Resolved UI-related defects and enhanced application usability and stability
- Participated in code reviews, ensuring high-quality and consistent front-end standards

- Built reusable and responsive UI components using React, HTML5, CSS3, and JavaScript
- Implemented modern design principles to improve user experience and accessibility
- Integrated frontend interfaces with backend REST APIs
- Applied data validation and UI consistency practices
- Gained experience in end-to-end frontend development lifecycle in Agile teams

PROJECTS

LashLens – AI-Based Makeup Recommendation System

Technologies: Angular, Python, OpenCV

- Designed a user-friendly front-end interface for image-based analysis and recommendations
- Focused on intuitive UI/UX design for seamless user interaction
- Integrated frontend with AI backend to display real-time results

Distributed Quiz Application

Technologies: Node.js, Docker, Azure

- Developed frontend interfaces for a distributed system
- Ensured responsive UI design and smooth user interactions
- Worked with microservices-based architecture and API integration

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

Presented at CSIT 2025
