ABOUT ME

Detail-oriented and analytical professional with hands-on experience supporting business-critical systems, validating data, resolving operational issues, and improving process efficiency in fast-paced environments. Experienced in handling structured workflows, investigating discrepancies, supporting internal stakeholders, and maintaining accuracy across high-volume tasks. Strong foundation in software systems, transaction-oriented processes, documentation, and operational troubleshooting. Currently pursuing an MSc in Data Science & Artificial Intelligence, bringing a strong mix of operational discipline, analytical thinking, and technical problem-solving.

CORE SKILLS

- **Operations Support**
- **Transaction Processing**
- **Data Validation & Accuracy Checks**
- **Reconciliation Support**
- **Process Improvement**
- **Issue Investigation & Resolution**
- **System Testing**
- **Documentation & Reporting**
- **Spreadsheet & Database Management**
- **Stakeholder Communication**
- **Risk Awareness**
- **Confidential Data Handling**
- **Workflow Coordination**
- **Problem Solving**
- **Attention to Detail**
- **Time Management**
- **Cross-functional Collaboration**
- **Agile / Structured Work Environments**

TECHNICAL TOOLS

- Systems & Tools: Excel, Git, TFS, Azure, Docker
 - Databases: MySQL
 - Programming / Querying: Python, JavaScript, SQL basics, Java, C++
 - Platforms: Angular, React, Node.js, .NET Core
-

PROJECTS

LashLens – Intelligent Recommendation System

Technologies: Python, CNN, OpenCV, Angular

- Built a structured system for analyzing image-based input data and generating personalized recommendations.
- Applied data preprocessing, validation, and classification methods to improve decision accuracy.
- Strengthened practical skills in data handling, workflow logic, and system reliability.

Distributed Quiz Application

Technologies: Node.js, Docker, RabbitMQ, Terraform, Azure

- Designed and deployed a distributed application using multiple interconnected services.
- Improved understanding of process flow, system coordination, and structured task execution across services.
- Used containerization and cloud deployment tools to support system reliability and scalability.

EDUCATION

Middlesex University Dubai

MSc Datascience and Artificial Intelligence - (Part Time)

(Expected Jan 2026)

University Of Central Lancashire

BSc (Hons) Software Engineering - First Class Honour

- Gold Medalist
 - APM - 77.4%
-

WORK EXPERIENCE

Scienter Technologies (Pvt) Ltd

2024-2025

Associate Software Engineer

- Supported day-to-day operational stability of business applications by investigating and resolving QA-reported defects and production issues in a timely manner.
- Performed data validation, logic checks, and issue analysis to ensure system accuracy and reduce workflow disruptions.
- Worked with structured business processes and internal stakeholders to identify discrepancies, troubleshoot issues, and implement practical solutions.
- Assisted in maintaining reliable system performance for enterprise applications used in finance-related environments.
- Improved backend API efficiency by up to 30%, contributing to faster processing and smoother user-facing operations.
- Participated in peer reviews, testing activities, and structured sprint delivery to ensure quality, consistency, and compliance with internal standards.
- Contributed to application enhancements in Angular and .NET Core, supporting both system functionality and process continuity.

Software Engineering Intern

2023-2024

- Supported frontend and backend system operations by developing and maintaining components used in day-to-day business workflows.
- Assisted with data validation, database-related tasks, and input accuracy to support reliable application performance.
- Helped identify and fix functional issues during testing and development cycles, improving system quality and reducing operational friction.
- Worked within collaborative delivery teams using Git and TFS to maintain version control, task tracking, and process visibility.
- Gained practical exposure to structured enterprise workflows, stakeholder support, and issue resolution in a professional environment.
- Contributed to system improvements with a strong focus on accuracy, functionality, and user support.
