ABOUT ME

Results-driven Software Engineer / IT Specialist with hands-on experience in system development, application support, backend development, troubleshooting, and technical operations. Skilled in Python, C++, .NET Core, Node.js, Angular, and React, with practical experience in system optimization, API performance tuning, debugging, technical documentation, and production issue resolution. Familiar with networking concepts, Linux/Windows environments, databases, cloud platforms, and system reliability practices. Strong ability to support cross-functional teams, maintain business-critical systems, and deliver technical solutions in fast-paced environments.

SKILLS

Programming & Development

- Python, C++, JavaScript, Java, .NET Core, Node.js, REST APIs

System Development & IT Support

- System Troubleshooting, Technical Support, Application Maintenance, Debugging & Issue Resolution, Performance Monitoring, System Documentation, Backup & Data, Integrity Awareness, Software Testing

Networking & Infrastructure

- TCP/IP, Routing & Switching (Fundamentals), Network Troubleshooting, Client-Server Architecture, Windows & Linux Environments, System Configuration Basics

Databases & Tools

- MySQL, Git, TFS, Docker, CI/CD Basics, Microsoft Azure
 - Additional Skills
 - Agile / Scrum, Problem Solving, Team Collaboration, Communication Skills, Attention to Detail
-

EDUCATION

Middlesex University Dubai

MSc Datascience and Artificial Intelligence - (Part Time)

(Expected Jan 2026)

Key focus areas: Data Analytics, Artificial Intelligence, Applied Statistics, Problem Solving

University Of Central Lancashire

BSc (Hons) Software Engineering - First Class Honour

- Gold Medalist
- APM - 77.4%

WORK EXPERIENCE

Scienter Technologies (Pvt) Ltd

2024-2025

Associate Software Engineer

- Developed, tested, and maintained enterprise applications using Angular, .NET Core, and backend services
- Diagnosed and resolved production issues, system bugs, and QA-reported defects, improving system stability and reliability
- Optimized backend APIs and application logic, achieving up to 30% reduction in response time
- Supported technical operations by troubleshooting application and system-related issues across development and testing environments
- Participated in peer code reviews, ensuring maintainable, secure, and high-quality code
- Assisted in maintaining system functionality and improving user experience through issue resolution and feature enhancements

2023-2024

Software Engineering Intern

- Assisted in developing frontend components and backend APIs using React and .NET Core
- Supported debugging, testing, and maintenance of software modules in a professional enterprise environment
- Implemented data validation and contributed to maintaining database integrity
- Used Git and TFS for version control, issue tracking, and collaborative development workflows
- Worked closely with senior engineers to improve system functionality and ensure smooth technical operations

PROJECTS

LashLens – Intelligent Recommendation System

Technologies: Python, OpenCV, CNN, Angular

- Built an AI-based system to analyze facial images and calculate eyelash length for personalized recommendations
- Applied Python-based image processing, computer vision, and model training techniques
- Worked with data preprocessing, model evaluation, and system integration

Distributed Quiz Application

Technologies: Node.js, Docker, RabbitMQ, Terraform, Azure

- Designed and developed a distributed system using microservices architecture
- Containerized applications with Docker and deployed to Microsoft Azure
- Implemented asynchronous communication using RabbitMQ
- Strengthened knowledge in system deployment, cloud environments, and service reliability

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025)
