

Arani Aravinthan

Full Stack Software Engineer with hands-on industry experience in building, optimizing, and deploying scalable web applications using Angular, React, Node.js, and .NET Core. Proven ability to improve system performance, collaborate in Agile teams, and deliver high-quality solutions in fast-paced environments. Currently pursuing a part-time MSc in Data Science & Artificial Intelligence, complementing strong software engineering foundations with data-driven and AI-focused skills.

📍 Dubai, UAE

SKILLS

- **Programming Languages:** Python, JavaScript, C++, Java
- **Frontend:** Angular, React, HTML5, CSS3
- **Backend:** Node.js, .NET Core, RESTful APIs
- **Databases:** MySQL
- **DevOps & Tools:** Docker, Microsoft Azure, Git, TFS, CI/CD basics
- **Concepts:** Agile/Scrum, Microservices, API Optimization, Performance Tuning

WORK EXPERIENCE

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 - Apr 2025

- Resolved QA-reported defects and production issues, improving application stability and end-user experience
- Optimized backend APIs, achieving up to **30% reduction in response time** through query and logic improvements
- Developed and enhanced application features in Angular and .NET Core within Agile sprint cycles
- Participated in peer code reviews to ensure code quality, maintainability, and best practices

Software Engineering Intern

Jun 2023 - Jun 2024

- Developed frontend components and backend REST APIs using React and .NET Core under senior supervision
- Implemented data validation and supported database schema design to maintain data integrity
- Used TFS and Git-based workflows for version control and collaborative development
- Gained end-to-end exposure to full-stack development in a real-world enterprise environment

EDUCATION

MSc Data Science & Artificial Intelligence (Part-Time)

MSc Data Science & Artificial Intelligence (Reading)

Jan 2026

- Currently pursuing advanced studies alongside professional commitments
- Key focus areas: Machine Learning, Data Analytics, Artificial Intelligence, Applied Statistics

University of Central Lancashire

Bachelor of Software Engineering - First Class Honors (77.4% APM) - 77.4%

March 2022 - May 2025

PROJECTS

Final Year Project – LashLens

Technologies: Python, CNN, OpenCV, Angular

- Built an AI-driven system to analyze **facial images and calculate eyelash length**, enabling **personalized product recommendations**.
- Applied **computer vision and AI/ML techniques** to preprocess data, train models, and generate actionable insights.

Distributed Quiz Application

Technologies: Node.js, Docker, RabbitMQ, Terraform, Azure

- Designed a distributed system using a microservices architecture
- Containerized services with Docker and deployed to Microsoft Azure
- Implemented asynchronous communication using RabbitMQ

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the **12th International Conference on Computer Science and Information Technology (CSIT 2025)**
