

Software Engineer and MSc Data Science & Artificial Intelligence student with professional experience developing enterprise applications and building AI-driven solutions. Skilled in Machine Learning, Deep Learning, Computer Vision, Python, SQL, and data analytics with hands-on experience developing CNN-based image recognition systems, predictive models, and data visualization dashboards. Passionate about applying AI and data science to solve real-world problems in aviation, automation, and intelligent systems.

SKILLS

Programming

• Python • Java • JavaScript • C++ • SQL

AI & Machine Learning

• Machine Learning, Deep Learning, Computer Vision, CNN, TensorFlow, PyTorch, Keras, OpenCV, Scikit-learn, NumPy, Pandas, Feature Engineering, Model Training, Model Evaluation, Data Preprocessing, Predictive Analytics, GenAI, Agentic AI, FastAPI, RAG, QDrant

Data Science

• Data Analysis, Data Visualization, Statistical Analysis, Power BI, DAX, Excel, KPI Reporting, Dashboard Development

Software Development

• Angular, React, HTML5, CSS3, Node.js, .NET Core, REST APIs, Microservices

Cloud & DevOps

• Microsoft Azure, Docker, Azure DevOps, Git, TFS, Terraform, RabbitMQ, CI/CD

Databases

• MySQL, PostgreSQL, Oracle, AWS

Methodologies

• Agile, Scrum, Performance Optimization, API Optimization

Project Management

• Stakeholder Communication, Time Management, Adaptability, Project Coordination & Tracking, Task Prioritization

WORK EXPERIENCE

Tech Unicorn - Dubai, UAE

Technical Project Management Intern

April 2026 - July 2026

- Coordinated software delivery activities across cross-functional development and QA teams within Agile environments.
- Utilized **Azure DevOps** and **Microsoft Teams** to manage sprint backlogs, track work items, and monitor project progress.
- Collaborated with development teams to oversee software delivery timelines, release planning, and deployment readiness.
- Supported software testing by validating implemented features, tracking defects, and ensuring quality standards prior to release.
- Maintained technical documentation, delivery reports, and project artifacts to improve project visibility and team collaboration.
- Participated in sprint planning, daily stand-ups, backlog refinement, sprint reviews, and stakeholder communications to support successful project execution.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 - Apr 2025

- Developed and enhanced enterprise web applications using **Angular**, **.NET Core**, and **RESTful APIs** within Agile development teams.
- Resolved QA-reported defects and production issues, improving application stability, reliability, and overall user experience.
- Optimized backend APIs and SQL queries, reducing response times by up to **30%** through performance tuning and efficient database operations.
- Participated in peer code reviews, ensuring code quality, maintainability, and adherence to software engineering best practices.
- Contributed to sprint planning, backlog refinement, and Agile ceremonies to support timely and successful project delivery.

Software Engineering Intern

Jun 2023 - Jun 2024

- Developed frontend components using **Angular** and implemented backend services and **REST APIs** with **.NET Core** under senior developer mentorship.
- Designed and implemented data validation logic while supporting database schema improvements to ensure data integrity and system reliability.
- Utilized **Git**, **TFS**, and **Azure DevOps** for version control, collaboration, and software lifecycle management.
- Participated in software testing, debugging, deployment, and maintenance activities across enterprise applications.
- Gained hands-on experience in full-stack software development, Agile methodologies, and enterprise software delivery.

PROJECTS

LashLens – AI Makeup Recommendation System

Python • TensorFlow • CNN • OpenCV • Angular

- Designed and developed an AI-powered computer vision system to analyze facial images and estimate eyelash length.
- Built and trained Convolutional Neural Networks (CNNs) for image classification.
- Applied image preprocessing, feature extraction, and model evaluation techniques using OpenCV and TensorFlow.
- Generated personalized product recommendations based on AI predictions.
- Developed an Angular interface for real-time image analysis and recommendation delivery.

Distributed Quiz Application

Node.js • Docker • RabbitMQ • Terraform • Azure

- Designed a scalable distributed system using a microservices architecture.
- Containerized backend services with Docker and deployed applications on Microsoft Azure.
- Implemented asynchronous inter-service communication using RabbitMQ.
- Automated infrastructure deployment using Terraform.
- Improved system scalability and maintainability through service decoupling.

Global Health Analytics Dashboard

Power BI • Python • DAX • SQL

- Built interactive dashboards analyzing obesity, diabetes, and hypertension trends across multiple countries.
- Cleaned and transformed public health datasets using Python and SQL.
- Developed dynamic DAX measures, drill-through reports, and Top-N analysis.
- Produced visual insights supporting data-driven healthcare decisions.

EDUCATION

Middlesex University Dubai

MSc Data Science & Artificial Intelligence

Jan 2026 Intake

University of Central Lancashire

Bachelor of Software Engineering

March 2022 - May 2025

- First Class Honors (77.4% APM)
- Gold Medalist

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025)
