

Arani Aravinthan

Software Engineer and MSc Data Science & Artificial Intelligence student with strong expertise in Business Intelligence, Power BI, SQL, and data analytics. Experienced in designing interactive dashboards, developing advanced DAX measures, performing data modeling using star schema principles, and transforming complex datasets into actionable business insights. Skilled in KPI reporting, healthcare analytics, SQL optimization, and building scalable reporting solutions that support strategic decision-making. Passionate about leveraging data visualization and analytics to improve organizational performance.

SKILLS

Business Intelligence

- Power BI Desktop
- Power BI Service
- DAX
- Power Query
- Data Modeling
- Dashboard Development
- KPI Reporting
- Drill-through Reports
- Interactive Reports
- Executive Dashboards
- Data Visualization

Databases

- SQL
- MySQL
- Oracle
- Database Design
- Query Optimization
- Data Validation

Analytics

- Statistical Analysis
- Data Analysis
- ETL
- Data Cleaning
- Data Transformation
- Business Intelligence
- Predictive Analytics

Power BI Modeling

- Star Schema
- Relationship Management
- Fact & Dimension Tables
- Calculated Columns
- Measures
- Row-Level Security (if you've learned it)
- Performance Optimization

WORK EXPERIENCE

Tech Unicorn - Dubai, UAE

Project Management Intern

April 2026

- Coordinated software development activities across developers, testers, and stakeholders using Azure DevOps and Microsoft Teams.
- Assisted in testing web and desktop applications by validating new features and documenting software defects.
- Worked with software teams to monitor feature delivery, application workflows, and release readiness.
- Helped organize technical documentation, sprint artifacts, and project tracking dashboards.
- Collaborated with cross-functional teams to improve communication between technical and non-technical stakeholders.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 - Apr 2025

- Optimized complex SQL queries and database operations, improving application performance by up to 30%.
- Validated backend data using SQL queries to ensure consistency and integrity across enterprise applications.
- Collaborated with QA and business teams to analyze data issues and support reporting requirements.
- Worked with relational databases, API data, and enterprise datasets to improve business workflows.

Software Engineering Intern

Jun 2023 - Jun 2024

- Supported the development, implementation, testing, and maintenance of enterprise software applications..
- Contributed to software development tasks and supported the implementation of assigned functional requirements.
- Worked with existing application components to understand system functionality and support application improvements.
- Collaborated with development and QA teams throughout software development and delivery activities.
- Participated in Agile ceremonies, sprint planning, and team coordination activities.
- Used Git and TFS as part of the software development and version control workflow.
- Prepared and maintained technical documentation and project records.
- Collaborated with senior developers and cross-functional teams to support successful software delivery.

EDUCATION

Middlesex University Dubai

MSc Data Science & Artificial Intelligence (Part-Time)

Jan 2026

University of Central Lancashire

Bachelor of Software Engineering

March 2022 - May 2025

- First Class Honors (77.4% APM)
- Gold Medalist

PROJECTS

Global Health Analytics Dashboard

Power BI • SQL • Python • DAX

- Designed an end-to-end Business Intelligence dashboard analyzing obesity, diabetes, hypertension, and physical inactivity across multiple countries.
- Built interactive Power BI dashboards featuring drill-through reports, slicers, bookmarks, KPI cards, and dynamic visualizations.
- Developed advanced DAX measures, calculated columns, ranking metrics, and time-based analytics.
- Designed a star schema data model with optimized relationships to improve dashboard performance.
- Cleaned, transformed, and integrated healthcare datasets using SQL and Python.
- Applied data modeling best practices to build scalable and reusable semantic datasets.
- Created executive dashboards enabling comparison of countries, regions, and healthcare indicators.
- Delivered actionable insights supporting healthcare policy evaluation and data-driven decision making.

LashLens – AI Makeup Recommendation System

Technologies: Python, OpenCV, CNN, Angular

- Designed and developed a full-stack AI-powered web application using Angular and Python.
- Built an intuitive user interface for image upload and recommendation generation.
- Integrated computer vision models with frontend workflows to deliver real-time recommendations.
- Focused on creating a simple and user-friendly application experience.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025).
- Research focused on AI-based facial analysis and intelligent product recommendation systems.
