

ARANI ARAVINTHAN

Data Analyst and MSc Data Science & Artificial Intelligence student with professional experience analyzing business data, developing dashboards, and supporting data-driven decision-making. Skilled in SQL, Python, R, Power BI, Excel, statistical analysis, and data visualization with experience cleaning, transforming, and analyzing complex datasets to generate actionable business insights. Experienced collaborating with cross-functional stakeholders, translating analytical findings into business recommendations, and improving reporting processes through data-driven solutions.

 araniaravin16@gmail.com  0503532764  Dubai, UAE

SKILLS

Programming

Python, R, SQL, Java

Databases

SQL, MySQL, Oracle

Analytics Tools

Power BI, Excel (Pivot Tables, Power Query, Lookup Functions), DAX, RStudio, Pandas, NumPy, Scikit-learn

Business Skills

Stakeholder Communication, Business Analysis, Process Improvement, Problem Solving, Presentation of Insights, Agile, Scrum

Data Analytics

Data Analysis, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Dashboard Development, KPI Reporting, Business Intelligence, Reporting & Insights, Trend Analysis, Data Validation, Data Transformation

WORK EXPERIENCE

Tech Unicorn

April 2026

Project Management Intern — Dubai, UAE

- Collected and analyzed project performance data to support software delivery decisions.
- Created project reports and monitored KPIs using Azure DevOps dashboards.
- Worked with cross-functional teams to track delivery progress and identify process improvement opportunities.
- Prepared technical documentation and business reports for project stakeholders.
- Supported testing activities through data validation, defect analysis, and reporting.
- Presented project updates and analytical findings during sprint reviews and stakeholder meetings.

Scienter Technologies (Pvt) Ltd

Jun 2024 – Apr 2025

Associate Software Engineer

- Analyzed SQL databases to identify data quality issues and improve reporting accuracy.
- Optimized SQL queries and backend data retrieval, reducing response times by up to 30%.
- Validated application and database data to ensure consistency, integrity, and reliability.
- Worked with cross-functional stakeholders to gather business requirements and support data-driven application enhancements.
- Supported Agile delivery by monitoring project metrics, resolving defects, and improving operational processes.

Software Engineering Intern

- Supported the development, implementation, testing, and maintenance of enterprise software applications.
- Contributed to software development tasks and supported the implementation of assigned functional requirements.
- Worked with existing application components to understand system functionality and support application improvements.
- Collaborated with development and QA teams throughout software development and delivery activities.
- Participated in Agile ceremonies, sprint planning, and team coordination activities.
- Used Git and TFS as part of the software development and version control workflow.
- Prepared and maintained technical documentation and project records.
- Collaborated with senior developers and cross-functional teams to support successful software delivery.

EDUCATION

Middlesex University Dubai

Jan 2026

MSc Data Science & Artificial Intelligence (Part-Time)**University of Central Lancashire**

March 2022 – May 2025

Bachelor of Software Engineering

- First Class Honors (77.4% APM)
- Gold Medalist

PROJECTS

Business Data Analytics using R**Technologies / Skills:** R • RStudio • tidyverse • ggplot2 • dplyr • Statistical Analysis

- Performed the complete end-to-end data analytics lifecycle using R.
- Collected, cleaned, transformed, and validated multi-source public health datasets.
- Conducted Exploratory Data Analysis (EDA) to identify trends, anomalies, and relationships between obesity, diabetes, hypertension, physical activity, and regional health indicators.
- Applied statistical analysis and correlation techniques to evaluate relationships between key health variables.
- Created high-quality visualizations using ggplot2 to communicate analytical findings effectively.
- Produced actionable insights and recommendations supported by data for evidence-based decision making.
- Documented the complete analytical workflow including data preparation, analysis, visualization, interpretation, and reporting.

Global Health Analytics Dashboard**Technologies / Skills:** Power BI • SQL • Python • DAX

- Designed interactive Power BI dashboards for analyzing global obesity, diabetes, hypertension, and physical activity trends.
- Cleaned, transformed, and integrated datasets using SQL and Python to improve reporting quality.
- Developed KPI dashboards, drill-through reports, Top-N analysis, and dynamic DAX measures.
- Identified trends and regional patterns to support data-driven decision-making.
- Presented analytical findings through interactive visualizations for technical and non-technical audiences.

LashLens – AI Makeup Recommendation System**Technologies / Skills:** Python • OpenCV • CNN • Angular

- Built a CNN model for image classification using TensorFlow.
- Applied image preprocessing and feature engineering techniques.
- Evaluated model performance using machine learning metrics.
- Developed a user interface for real-time prediction and visualization.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025).
- Research focused on AI-based facial analysis and intelligent product recommendation systems.
