

Arani Aravinthan

Software Engineer and MSc Data Science & Artificial Intelligence student with experience developing enterprise web applications, REST APIs, databases, and AI-powered solutions. Skilled in React, Angular, Python, SQL, application development, workflow automation, and Agile software delivery. Passionate about building user-focused software that solves real-world business problems.

SKILLS

Programming	Python • JavaScript • Java • SQL • C++
Web Development	React • Angular • HTML5 • CSS3 • Node.js • .NET Core • REST APIs
Databases	MySQL • Oracle • SQL Server
AI & Automation	Generative AI • Agentic AI • TensorFlow • OpenCV • Scikit-learn • AI Productivity Tools
Cloud & DevOps	Azure • Azure DevOps • Docker • Git • Terraform • RabbitMQ
Data & Analytics	Power BI • Excel • DAX • Pandas • NumPy
Methodologies	Agile • Scrum • API Integration • Software Testing • UI Development • Documentation

WORK EXPERIENCE

Tech Unicorn - Dubai, UAE

Project Management Intern

April 2026

- Coordinated software development activities across developers, testers, and stakeholders using Azure DevOps and Microsoft Teams.
- Assisted in testing web and desktop applications by validating new features and documenting software defects.
- Worked with software teams to monitor feature delivery, application workflows, and release readiness.
- Helped organize technical documentation, sprint artifacts, and project tracking dashboards.
- Collaborated with cross-functional teams to improve communication between technical and non-technical stakeholders.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 – Apr 2025

- Built and enhanced enterprise web applications using Angular, .NET Core, SQL, and REST APIs.
- Worked closely with QA, business analysts, and end users to translate business requirements into software features.
- Designed database queries and optimized SQL operations for improved system performance.
- Debugged production issues and implemented reliable software fixes across enterprise systems.
- Collaborated with cross-functional teams using Agile Scrum methodologies.

Software Engineering Intern

Jun 2023 – Jun 2024

- Supported the development, implementation, testing, and maintenance of enterprise software applications.
- Contributed to software development tasks and supported the implementation of assigned functional requirements.
- Worked with existing application components to understand system functionality and support application improvements.
- Collaborated with development and QA teams throughout software development and delivery activities.
- Participated in Agile ceremonies, sprint planning, and team coordination activities.
- Used Git and TFS as part of the software development and version control workflow.
- Prepared and maintained technical documentation and project records.
- Collaborated with senior developers and cross-functional teams to support successful software delivery.

EDUCATION

Middlesex University Dubai

MSc Data Science & Artificial Intelligence (Part-Time)

Jan 2026

University of Central Lancashire

Bachelor of Software Engineering

March 2022 – May 2025

- First Class Honors (77.4% APM)
- Gold Medalist

PROJECTS

LashLens – AI Makeup Recommendation System

Technologies: Python, OpenCV, CNN, Angular

- Designed and developed a full-stack AI-powered web application using Angular and Python.
- Built an intuitive user interface for image upload and recommendation generation.
- Integrated computer vision models with frontend workflows to deliver real-time recommendations.
- Focused on creating a simple and user-friendly application experience.

Student Management System

Technologies: React • Node.js • SQL

- Designed a web-based management system for students, tutors, schedules, and attendance.
- Implemented CRUD operations using REST APIs.
- Developed a relational database for student and tutor records.
- Built responsive dashboards for managing users and sessions.
- Focused on clean UI and intuitive workflows.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the **12th International Conference on Computer Science and Information Technology (CSIT 2025)**.
- Research focused on AI-based facial analysis and intelligent product recommendation systems.
