

Arani Aravinthan

Software Engineer and MSc Data Science & Artificial Intelligence student with 2+ years of professional experience in software development and enterprise application development. Experienced in C#, .NET Core, API development, SQL, Angular, Python, and object-oriented programming. Strong foundation in Data Structures and Algorithms, software engineering principles, and the Software Development Life Cycle (SDLC), with experience contributing to requirements analysis, design, implementation, testing, debugging, deployment, and maintenance of software applications. Experienced in working with development and QA teams in Agile/Scrum environments and using Git, TFS, and Azure DevOps for source control, collaboration, and software delivery workflows. Knowledge of Artificial Intelligence, Machine Learning, Data Analysis, and AI-assisted software development, with a strong interest in building AI-driven, data-intensive applications and improving automation and workflow efficiency.

📍 Dubai, UAE

SKILLS

Programming & Computer Science

- C#, Python, SQL
- Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem Solving
- Software Engineering Principles

Backend & Software Development

- .NET Core, Backend Development, RESTful API Development, API Integration, Database Integration
- Enterprise Application Development, Software Design & Implementation
- Software Testing & Debugging
- Software Maintenance
- Software Development Life Cycle (SDLC)
- Requirements Analysis

AI & Data

- Artificial Intelligence, Machine Learning, Data Science, Data Analysis Life Cycle
- Power BI
- AI-Assisted Development
- AI-Assisted Debugging and Code Generation

Development Tools & Version Control

- Git, TFS (Team Foundation Server), Azure DevOps
- Microsoft Visual Studio, GitHub Copilot, Cursor, Claude Code

Software Development Practices

- Agile, Scrum, Sprint Planning, Backlog Refinement, Code Collaboration
- Technical Documentation
- Cross-functional Collaboration
- Issue Tracking
- Process Improvement

WORK EXPERIENCE

Tech Unicorn - Dubai, UAE

Project Management Intern

April 2026

- Coordinated project activities across development and QA teams to support software delivery, project milestones, and operational objectives.
- Tracked sprint progress, deliverables, project status, and issues using Azure DevOps.
- Collaborated with technical teams and business stakeholders to support requirements understanding and effective communication.
- Assisted with project planning, issue tracking, release coordination, and follow-up activities across multiple tasks.
- Participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Maintained technical and project documentation, status reports, meeting records, and project updates.
- Collaborated with cross-functional teams to identify issues, improve workflows, and support efficient project delivery.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 - Apr 2025

- Contributed to the development and maintenance of enterprise applications using C#, .NET Core, Angular, and SQL.
- Worked across backend and frontend components to implement application enhancements and support software development activities.
- Contributed to backend development and API integration using .NET Core to support application functionality and communication between system components.
- Applied Object-Oriented Programming (OOP) and software engineering principles during application development and maintenance.
- Worked with existing software systems to understand technical and business requirements and implement improvements.
- Collaborated with developers, QA engineers, and business stakeholders throughout the Software Development Life Cycle (SDLC).
- Used Git and TFS for version control, source code management, development collaboration, and project workflows.
- Identified opportunities for process improvement and contributed to initiatives that improved software development workflows and operational efficiency.

Software Engineering Intern

Jun 2023 - Jun 2024

- Supported the development, implementation, testing, and maintenance of enterprise software applications..
- Contributed to software development tasks and supported the implementation of assigned functional requirements.
- Worked with existing application components to understand system functionality and support application improvements.
- Collaborated with development and QA teams throughout software development and delivery activities.
- Participated in Agile ceremonies, sprint planning, and team coordination activities.
- Used Git and TFS as part of the software development and version control workflow.
- Prepared and maintained technical documentation and project records.
- Collaborated with senior developers and cross-functional teams to support successful software delivery.

EDUCATION

Middlesex University Dubai

MSc Data Science & Artificial Intelligence (Part-Time)

Jan 2026

University of Central Lancashire

Bachelor of Software Engineering

March 2022 - May 2025

- First Class Honors (77.4% APM)
- Gold Medalist

PROJECTS

LashLens – AI Makeup Recommendation System

Technologies: Python, OpenCV, CNN, Angular

- Designed and developed an AI-based makeup recommendation system using **Artificial Intelligence, Machine Learning, Computer Vision, and Python**.
- Applied **image processing** and **machine learning concepts** to analyze facial and eyelash characteristics and generate personalized recommendations.
- Managed the project lifecycle from requirements analysis and research through system development, implementation, and evaluation.
- Applied software engineering principles to plan development activities, manage milestones, and integrate technical requirements.

Distributed Quiz Application

Technologies: Node.js, RabbitMQ, Docker, Terraform, Microsoft Azure

- Designed and implemented a **distributed microservices-based system** for scalable quiz delivery.
- Built backend services using **Node.js and asynchronous messaging with RabbitMQ**.
- Containerized applications using **Docker and deployed to Microsoft Azure**.
- Implemented infrastructure provisioning using **Terraform**.

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the **12th International Conference on Computer Science and Information Technology (CSIT 2025)**.
- Research focused on **AI-based facial analysis and intelligent product recommendation systems**.
