

ARANI ARAVINTHAN

Software Engineer and MSc Data Science & Artificial Intelligence student with experience building enterprise applications and AI-powered systems. Skilled in Python, Node.js, Docker, Machine Learning, Computer Vision, and Generative AI, with hands-on experience integrating LLMs into applications and developing scalable microservice solutions. Passionate about building intelligent agents and AI-powered products that solve real-world problems.

✉ araniaravin16@gmail.com | ☎ 0503532764 | 📍 Dubai, UAE

SKILLS

Data Analytics & AI: Python, SQL, R, Power BI, DAX, Excel, Statistical Analysis, Data Visualization, Dashboard Development, Data Cleaning, Exploratory Data Analysis (EDA), Predictive Analytics, Machine Learning, Deep Learning, Computer Vision, TensorFlow, OpenCV, CNN, Scikit-learn, Pandas, NumPy, Large Language Models (LLMs), Prompt Engineering, Generative AI, AI Agents, Model Evaluation

Version Control & DevOps: Microsoft Azure, AWS, Docker, Azure DevOps, Git, Terraform, RabbitMQ, CI/CD

Methodologies: Agile, Scrum, API Optimization, Performance Optimization

Software Development: Node.js, Python, JavaScript, React, Angular, REST APIs, Microservices

WORK EXPERIENCE

Tech Unicorn

Dubai, UAE

Project Management Intern

April 2025

- Coordinated project activities across development and QA teams, supporting the timely delivery of software projects and business objectives.
- Collaborated with business stakeholders to identify key metrics and reporting requirements for Power BI dashboards, ensuring meaningful business insights.
- Maintained project documentation, status reports, meeting records, and stakeholder updates to support project visibility.
- Supported communication between technical and business teams, facilitating requirement gathering and issue resolution.
- Assisted with project planning, release coordination, issue tracking, and continuous process improvements through Agile practices.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 – Apr 2025

- Developed and enhanced enterprise applications while collaborating with cross-functional teams to deliver business solutions.
- Analyzed and optimized SQL queries and application performance, reducing response times by up to 30%.
- Worked with structured data and backend services to ensure reliable data processing and system performance.
- Investigated and resolved application issues through data analysis and root cause identification.
- Collaborated with developers, QA engineers, and stakeholders to deliver high-quality software solutions.
- Utilized version control and project management tools to support collaborative software development.
- Collaborated on backend API development and performance optimization within Agile engineering teams.

Software Engineering Intern

Jun 2023 – Jun 2024

- Developed and maintained web application features while collaborating with senior developers.
- Worked with SQL databases to support data validation, integrity, and application functionality.
- Assisted in developing backend services and integrating application components.
- Collaborated within Agile teams to deliver project requirements and continuously improve development processes.
- Gained practical experience in software development, database management, and collaborative project delivery.

EDUCATION

Middlesex University Dubai

Jan 2026

MSc Data Science & Artificial Intelligence

University of Central Lancashire

March 2022 – May 2025

Bachelor of Software Engineering

- Overall: 77.4% (First Class Honors)
- Awarded Gold Medal for Academic Excellence

PROJECTS

Distributed Quiz Platform

Node.js • Docker • RabbitMQ • Terraform • Azure

- Designed and developed a distributed microservices platform using Node.js, Docker, and RabbitMQ.
- Built REST APIs enabling communication between independent services.
- Containerized backend services using Docker for scalable deployment.
- Automated infrastructure provisioning using Terraform.
- Implemented asynchronous event-driven messaging using RabbitMQ.
- Deployed services on Microsoft Azure.
- Integrated Large Language Models (LLMs) to assist with intelligent response generation and explored AI-assisted workflow automation within the application.

LashLens – AI Makeup Recommendation System

OpenCV • CNN • Python • Angular

- Built CNN-based image classification models using TensorFlow.
- Designed image preprocessing and feature extraction pipelines using OpenCV.
- Evaluated model performance using multiple validation metrics.
- Developed an AI-powered recommendation engine for personalized makeup suggestions.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025).
