ABOUT ME

Operations-focused graduate with hands-on experience supporting fast-paced business and technology environments. Skilled in cross-functional coordination, issue resolution, process improvement, performance tracking, and day-to-day operational support. Strong communicator with a proactive and detail-oriented approach, currently pursuing an MSc in Data Science & Artificial Intelligence while building practical experience in operations, analytics, and business problem-solving.

SKILLS

- Operations Coordination
- Process Improvement
- Data Tracking & Reporting
- Problem Solving
- Cross-Functional Collaboration
- Stakeholder Communication
- Training & Support
- Time Management & Multitasking
- Attention to Detail
- Microsoft Excel / Google Sheets
- Agile / Team Collaboration
- Basic Technical Troubleshooting

TECHNICAL SKILLS

- Python, JavaScript, C++, Java
 - Angular, React, HTML, CSS
 - Node.js, .NET Core, REST APIs
 - MySQL
 - Docker, Git, Microsoft Azure
-

EDUCATION

Middlesex University Dubai

MSc Datascience and Artificial Intelligence - (Part Time)

(Expected Jan 2026)

Key focus areas: Data Analytics, Artificial Intelligence, Applied Statistics, Problem Solving

University Of Central Lancashire

BSc (Hons) Software Engineering - First Class Honour

- Gold Medalist
- APM - 77.4%

WORK EXPERIENCE

Scienter Technologies (Pvt) Ltd

2024-2025

Associate Software Engineer

- Supported day-to-day delivery of business applications by identifying, tracking, and resolving operational and system issues reported by QA and end users.
- Coordinated with internal teams to close functional and technical gaps, helping improve service reliability and workflow efficiency.
- Monitored system performance and contributed to process improvements that reduced backend response time by up to 30%.
- Worked in Agile sprint cycles to support timely task completion, issue follow-up, and team collaboration in a fast-paced environment.
- Participated in review and testing activities to ensure quality, accuracy, and smooth delivery of new features.

Software Engineering Intern

2023-2024

- Assisted in supporting application delivery by completing assigned tasks, validating data, and helping maintain workflow accuracy.
- Collaborated with team members on system enhancements, issue handling, and implementation of new requirements.
- Contributed to data validation and backend support activities to improve reliability and consistency.
- Gained experience working in a structured team environment with multiple stakeholders and deadlines.
- Used internal tools and workflows to manage tasks, track progress, and support project execution.

PROJECTS

LashLens – Intelligent Recommendation System

Technologies: Python, CNN, OpenCV, Angular

- Developed a system that analyzed user input data and images to generate tailored recommendations.
- Applied structured problem-solving, data handling, and workflow design to deliver an end-to-end solution.
- Strengthened analytical, technical, and project coordination skills through independent development.

Distributed Quiz Application

Technologies: Node.js, Docker, RabbitMQ, Terraform, Azure

- Built and organized a multi-component application requiring coordination across several services.
- Improved understanding of process flow, system reliability, and structured implementation.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025)
