

Arani Aravinthan

Software Engineer and MSc Data Science & Artificial Intelligence student with professional experience building data-driven applications and AI solutions. Experienced in Python, R, SQL, Machine Learning, Power BI, and statistical data analysis to transform complex datasets into actionable business insights. Skilled in dashboard development, predictive analytics, data visualization, and cross-functional collaboration within Agile environments. Passionate about leveraging analytics, experimentation, and AI to solve real-world business problems.

araniaravin16@gmail.com | 0503532764 | Dubai, UAE

SKILLS

Data Analytics

- Python, SQL, R, Power BI, DAX, Excel
- Statistical Analysis, Data Visualization, Dashboard Development
- Data Cleaning, Exploratory Data Analysis (EDA), Predictive Analytics

AI & Machine Learning

- Machine Learning, Deep Learning, Computer Vision
- TensorFlow, Keras, Scikit-learn, OpenCV, NumPy, Pandas
- GenAI, Agentic AI, LLMs

Version Control & DevOps

- Microsoft Azure, AWS, Docker, Azure DevOps, Git, Terraform, RabbitMQ, CI/CD

Backend & APIs

- REST APIs, SQL, MySQL, Oracle

Methodologies

- Agile, Scrum, API Optimization, Performance Optimization

WORK EXPERIENCE

Tech Unicorn - Dubai, UAE

Project Management Intern

April 2025 – Present

- Coordinated project activities across development and QA teams, supporting the timely delivery of software projects and business objectives.
- Tracked project schedules, sprint progress, deliverables, and project status using Azure DevOps.
- Collaborated with business stakeholders to identify key metrics and reporting requirements for Power BI dashboards, ensuring meaningful business insights.
- Assisted in defining dashboard requirements by evaluating application data and determining relevant KPIs and visualizations for decision-making.
- Maintained project documentation, status reports, meeting records, and stakeholder updates to support project visibility.
- Supported communication between technical and business teams, facilitating requirement gathering and issue resolution.
- Assisted with project planning, release coordination, issue tracking, and continuous process improvements through Agile practices.

Scienter Technologies (Pvt) Ltd

Associate Software Engineer

Jun 2024 – Apr 2025

- Developed and enhanced enterprise applications while collaborating with cross-functional teams to deliver business solutions.
- Analyzed and optimized SQL queries and application performance, reducing response times by up to 30%.
- Worked with structured data and backend services to ensure reliable data processing and system performance.
- Investigated and resolved application issues through data analysis and root cause identification.
- Collaborated with developers, QA engineers, and stakeholders to deliver high-quality software solutions.
- Utilized version control and project management tools to support collaborative software development.

Scienter Technologies (Pvt) Ltd

Software Engineering Intern

Jun 2023 – Jun 2024

- Developed and maintained web application features while collaborating with senior developers.
- Worked with SQL databases to support data validation, integrity, and application functionality.
- Assisted in developing backend services and integrating application components.
- Collaborated within Agile teams to deliver project requirements and continuously improve development processes.
- Gained practical experience in software development, database management, and collaborative project delivery.

EDUCATION

Middlesex University Dubai

Jan 2026

MSc Data Science & Artificial Intelligence

University of Central Lancashire

March 2022 – May 2025

Bachelor of Software Engineering

- Overall: 77.4% (First Class Honors)
- Awarded Gold Medal for Academic Excellence

PROJECTS

Global Health Analytics Dashboard

Power BI • Python • SQL • DAX • R

- Built interactive dashboards analyzing obesity, diabetes, and hypertension trends across multiple countries using Power BI.
- Cleaned, transformed, and analyzed healthcare datasets using Python, SQL, and R.
- Developed dynamic DAX measures, KPI tracking, drill-through reports, and Top-N analysis.
- Performed exploratory data analysis to identify trends, regional patterns, and key public health insights.
- Presented actionable visualizations supporting data-driven decision making.

LashLens – AI Makeup Recommendation System

R • SQL • Python

- Performed exploratory data analysis on customer behavior using R.
- Built statistical models to identify customer segments and purchasing trends.
- Visualized insights using ggplot2 and generated business recommendations.
- Used SQL for data extraction and preprocessing prior to analysis.

PUBLICATION

LashLens: An Intelligent System for Makeup Recommendation

- Accepted and presented at the 12th International Conference on Computer Science and Information Technology (CSIT 2025).
